

Quarterly projects, 2019

All the images will be projected. You can also print them if you so wish.

NOTE: 4th quarter will be reviewed at the December meeting, **UNLESS** every day is sunny in October & November.

1st Quarter - Yummy Food

It turns up and you say “wow” - I must shoot that before devouring it. Food is what I’m talking about. It must be edible and there must be oozing delight and **THREE** images are required for your project to be valid.

2nd Quarter - Zoom in - fully

Bright lights or dark shadows, strong lines or fluent transitions. Every picture has its own characteristics, especially when you zoom in. For this project, you **MUST** use the maximum telephoto setting available, it must be just **THREE** images, but each one a different type of subject eg landscape, birds, trees, buildings, portrait, etc. All taken fully zoomed in.

3rd Quarter - Perfect your group shot

Good composition always helps, particularly in a group shoot. In fact, you don’t need people to practice it! Shoot your own daytime scenes, using at least 5 **RELATED** objects arranged to really amaze us. Could be soft toys, cushions, cutlery, crockery, or even people. Then show us **TWO** of the best.

4th Quarter - Abysmal

All forms of weather have their own virtues. A good black and white image, full of atmosphere plus two in colour is what you need. No sunshine, not indoors - the more dramatic the weather the closer you are to the aims of this project with your **THREE** photos.
